

INCLUSIVE

COMMUNICATION SERVICES

Audio Description Services

DESCRIPTION OPTIONS

- **Standard descriptions** fit within existing audio pauses, ideal for videos with frequent pauses or minimal visual detail. Requires no editing of the original content.
- **Extended descriptions** pause the original video, providing additional audio time for detailed descriptions, suitable for videos with continuous audio or intricate visuals. This requires editing the original video.

WHAT INFORMATION IS DESCRIBED

- **Names** identifying all speakers and individuals on screen or stage
- The **entry and exit** of individuals appearing on screen or stage
- **Facial expressions** in an objective manner
- **Actions** or movements are narrated
- Details about the **scene or setting**
- **Visual aids** such as charts, diagrams, and images are clearly explained

WHAT IS AD

Audio descriptions are **narrated explanations of visual elements** in movies, TV shows, or other media for people who are blind or with low vision. They provide essential context about scenes, actions, and other visual details not conveyed through dialogue or sound effects alone, enabling full enjoyment and comprehension of the content.
